

Quick and easy deliveries of spare parts for high availability and reduced inventory

## Speedy Delivery of Spares

By keeping the large majority of the most frequently required spare parts in stock, we can deliver spare parts instantly from hubs all over the world. With Sulzer Speedy Delivery of Spares you can keep your stock at minimum level – without jeopardizing your process reliability.

### Our Warehouse Is Your Warehouse

Keeping spare parts in stock at a minimum, while being able to maintain performance and operational reliability, is a growing challenge. You need a partner with the capability and commitment to go beyond the expected.

Sulzer Speedy Delivery of Spares means that you can rely on quick and easy deliveries of spare parts for high availability and reduced inventory. We maintain a complete range of the most common spare parts for instant delivery at hubs all over the world.

Our dedicated warehouses and hubs have a complete assortment of high-quality spare parts, ensuring both high

availability and speedy deliveries with short lead times. This in turn means that you are able to reduce your own stock, which helps free up capital. What's more, with a very short lead time we are even able to offer trimmed and dynamically balanced impellers that meet your specific requirements, thus resulting in substantial energy savings.

### Typical Parts on Stock

Impellers, side plate/wear discs, wear rings, shafts, shaft sleeves, shaft seals, bearings, bearing assemblies/bearing units, seal cartridges, service kits and others.

### Key Benefits

- Easy order handling ensures quick service and speedy shipment of spare parts.
- High availability of spare parts for maximum uptime.
- Helps reduce on-site stock and cost of spare parts.
- Extensive spare parts offer for all small and mid-size process pumps and older ranges helps extend service life.

SDS - Speedy Delivery of Spares does in practice mean same day shipment
